

## DID YOU KNOW?

- Recycling **one car** saves the energy equivalent of 502 gallons of gasoline—and reduces greenhouse gas emissions by 8,811 pounds!
- Recycling **one refrigerator** saves the energy equivalent of 36 gallons of gasoline—and reduces greenhouse gas emissions by 566 pounds!
- Recycling **10 pounds of aluminum cans** saves the energy equivalent to 7 gallons of gasoline—and reduces greenhouse gas emissions by 16 pounds!

## 'LEARN. RECYCLE. EARN.' SCRAP METAL FUNDRAISING DRIVE

- The local community (family, friends, neighbors, neighborhood businesses) can be invited to bring scrap metal to a campus drop-off site on a designated day. Trucks from GotScrap.com® will remove all donations the same day, so space or storage is never an issue.
- Parents can be invited to involve their companies and employers.
- All donated items will be sorted, weighed and sold at full market value for scrap, and every dollar raised will come back to your school in the form of a check made payable to the organizing student club or group. It's an efficient, profitable way to quickly raise money for student programs and equipment.

# LEARN. RECYCLE. EARN.

A Unique Educational Fundraising  
Program sponsored by GotScrap.com®  
and SA Recycling
